The site was acquired by the White Pine County Board of Commissioners via quitclaim on March 14, 1994.

Environmental Work: Phase I and Phase II Environmental Site Assessments were completed in the last quarter of 2012. Asbestos containing materials, lead-based paint, and polychlorinated biphenyls (transformers) were present.

Existing Condition: Abatement of asbestos and lead containing materials was initiated in the last quarter of 2013. Abatement was completed in the spring of 2014.

Future Use: The McGill Ball Park, which is the oldest ball park in the State of Nevada, received funding for refurbishing and reuse as a community facility.
